EDUCATION

University of California, Berkeley

Berkeley, CA

B.S. in Electrical Engineering and Computer Science

Expected Graduation – 3 Semesters Remaining

- GPA: 3.733 | Relevant Coursework: CS61A, CS61B, CS61C, CS70, EE16A, EE64, ENG125

EXPERIENCE

Mobile & AI Developer

May 2026 – Present

BlueRobins (Skydeck Startup)

Remote

- Engineered and shipped the company's full end-to-end **mobile application** codebase from concept to production
- Engineered an AI retrieval bot using **PostgreSQL (pgvector)** and custom **RPC** functions to execute real-time cosine similarity search across input embeddings
- Strengthened security posture by managing **AWS** secret rotation, enforcing **Row-Level Security (RLS)** in **Supabase**, and isolating **CRON/JWT** auth mechanisms

Stanford & Berkeley AI Mobilebench Research Intern

Aug. 2025 – Jun. 2026

Berkeley Artificial Intelligence Research (BAIR) / Stanford SAIL, Prof. Dawn Song's Lab

On-site

- Engineered synthetic exploits in sandboxed **APKs** to benchmark **LLM**-driven vulnerability detection, partnering with 30+ researchers and 5+ industry/graduate leads

Backend Developer / CS Lead

July 2024 – Present

Virtual Medical Missions

On-site

- Spearheaded **backend architecture** using **Quart/Flask** and **PostgreSQL**, cutting project delivery timelines by ~30%
- Revived team operations after an organizational collapse, boosting project completion rates by ~70% through rebuilt workflows and cross-team collaboration

3D Game Developer Intern

Feb. 2024 – May 2024

Coding Stem Academy

On-site

- Taught **Unity**, **GIMP**, and **C#** to high school students; mentored 20+ students to deliver completed **IgniteCS** projects ahead of deadline

Roblox Indie Developer Lead

July 2022 – Jan. 2026

Agile Studios

Hybrid

- Directed a cross-functional team of 10+ developers building an indie **Roblox** title that reached 60K+ **YouTube** views
- Authored 10K+ lines of production code, architecting **AI**-driven NPCs, combat systems, and physics-based movement mechanics

PROJECTS

UnstableREM: LLM Tool-Calling Pipeline for Procedural World Generation | OpenRouter, MediaPipe, Roblox, Lua

- Architected an **OpenRouter** LLM tool-calling pipeline translating real-time eye-tracking data (**MediaPipe**) into procedurally generated **Roblox** environments; open-sourced the project, gaining 3,000+ **YouTube** views

Empath AI: Fine-Tuned Text-Generation Model Therapist | Mistral-7B, Next.js, FastAPI

- Fine-tuned **Mistral-7B** based on 8,500+ curated emotional-text samples, accelerating training 4x via **FlashAttention 2** and GPU memory optimization

CVision: Serverless Resume Screening | Next.js, FastAPI, AWS Lambda/S3/DynamoDB

- Architected a **serverless**, full-stack resume screening platform on **AWS**, achieving ~5-second processing latency per file

TECHNICAL SKILLS

Languages: Python, Java, C++, JavaScript, SQL, Dart, LuaU

Frameworks/Services: React, Next.js, Flask, FastAPI, AWS, Supabase, Firebase

Tools: Git, Docker

Other: RESTful API Design, Application Security, Google Certs (Cybersecurity, Python)
